Portfolio: https://badri-visual-vault.vercel.app/

I am a Frontend web developer, my expertise lies in crafting web applications.
I'm passionate about creating user-friendly interfaces and thrive on turning innovative ideas into polished digital solutions. I believe in the power of collaboration and enjoy connecting with fellow developers to exchange insights and ideas.

Personal Projects

Badri-visual-vault (Portfolio)

React Js, Bootstrap

Developed a personal portfolio website using React.js, Bootstrap 5, and deployed it using Vercel and GitHub. The portfolio features a dynamic homepage with slider and a downloadable CV button for easy access to my resume.
The About section, provide a detailed overview of my background and aspirations.
The Projects section showcases my accomplishments using card components within a container, while the Contact section facilitates seamless communication through SMTP mail server integration.
Leveraging React Hooks and routing ensures an interactive and intuitive user experience.

Weather App
React js
Developed a React-based weather application featuring a dynamic weather card component, seamlessly displaying current weather data.
By Utilized useState and useEffect hooks for efficient state management and fetch data upon page mount. Implemented robust error handling to gracefully manage API fetch errors and invalid city name inputs.
Additionally, showcased dynamic presentation of the current date, day, month, and year, enhancing user experience with comprehensive weather information and real-time updates.

Netflix-Landing-Page-Clone
HTML, CSS

I designed and developed a Netflix homepage clone using HTML and CSS, showcasing my frontend web development skills.
The clone accurately replicates the layout and design of the original Netflix homepage, demonstrating my attention to detail and ability to recreate complex user interfaces.
Through this project, I improve my proficiency in HTML and CSS, mastering techniques for layout and styling.
This experience showcases my capability to create visually appealing and functional websites without relying on external libraries or frameworks. The project underscores my commitment to continuous learning and my passion for frontend development.

Education

Bachelor's Of Computer Application - BCA in Computer Software Engineering April 2020 - July 2023
Salipur Autonomous College at Salipur, Cuttack, Grade – 8.4 CGPA
Completed Graduation with BCA degree and looking forward my dream company.
